Education

Presidency University

May 2019 – December 2022

B.Sc. in Computer Science and Engineering, CGPA: 3.99

Dhaka, Bangladesh

Relevant Coursework

Data Structures, Algorithms Analysis, Database Management, Operating System, Design Patterns, AI, System Design

Experience

EvidentBD

January 2025 – Present

Senior Software Engineer

Dhaka, Bangladesh

- Optimized microservices architecture, improving system performance by 30–60%.
- Developed backend for multi-channel e-commerce (Amazon, eBay, Shopify, WooCommerce, Temu, TikTok) with OAuth-based API authentication and automated shipping/tracking via FedEx, DHL, and Royal Mail.
- Built HR modules for onboarding, biometric attendance, and payroll; implemented Celery pipelines for real-time sync and fault-tolerant inventory updates.
- Led code reviews, mentored junior engineers, and managed CI/CD pipelines with Docker/Kubernetes.

Intellectra

February 2024 – December 2024

Software Engineer (Contract)

France, Remote

- Architected a full-stack job search and matching platform (Django, ReactJS) with an ML-powered recommendation engine using cosine similarity and TF-IDF vectorization to rank candidates against job postings.
- Built automated scrapers to aggregate and normalize job listings from multiple external platforms; optimized REST APIs for profile management, recommendations, and search filtering.

HealthOS Limited

February 2023 – January 2024

Junior Software Engineer

Dhaka, Bangladesh

- Developed Django REST APIs with PostgreSQL; implemented Celery async tasks, Selenium automation.
- Enhanced analytics with Pandas/NumPy; followed Agile and TDD practices for scalable, maintainable software.

Projects

ManageYourEcommerce.com | *Django, FastAPI, PostgreSQL, Socket.IO, Docker, AWS, RabbitMQ, OAuth*

2025

- Unified e-commerce ops platform integrating multiple marketplaces; real-time order/inventory/shipping sync via Celery, RabbitMQ & Socket.IO; automated SKU mapping reduced manual reconciliation by 40%.

BillSheba | *Django, DRF, PostgreSQL, MikroTik API, Celery, Docker, NextJS, VPS Hosting*

2025

- Built a SaaS platform for ISP billing and MikroTik router management; automated subscriber provisioning, bandwidth control, and invoice generation with real-time synchronization between billing engine and network devices.

AttendanceKeeper.net | *Django, PostgreSQL, Celery, AWS, Biometric Integration*

2025

- Cloud-based HR system with GPS & biometric verification; automated payroll, leave, overtime computation, and real-time monitoring dashboards.

Suppliers.com | *Python, DRF, Selenium, Elasticsearch, Docker, AWS*

2022

- B2B supplier marketplace with Elasticsearch-powered search, Redis caching, and Celery async pipelines for data processing and external service integration.

Technical Skills

Languages: Python, JavaScript, SQL **Databases:** PostgreSQL, MongoDB, Redis, Elasticsearch

Tools: Docker, Kubernetes, AWS (S3, EC2, SNS, SQS), Git, GCP, Linux

Frameworks: Django, DRF, FastAPI, Celery, RabbitMQ, Microservices, ReactJS, Selenium, Pandas, NumPy, Scikit-learn, GitLab CI/CD

Extracurricular

- Awarded Honor at ICPC Asia Dhaka Regional Contest (Team Lead), October 2022.
